NATURAL SWEETENERS

MONK FRUIT SWEETENER WITH ALLULOSE

KEY BENEFITS

Contains zero net carbs and low in calories

Tastes great with no aftertaste

Does not contain sugar alcohols

1:1 sweetness to sugar

Natural guilt-free sugar replacement

WHAT IS IT

Monk fruit is a natural sweetener derived from a small fruit traditionally grown in the mountains of China. Its sweetness comes from antioxidant compounds called mogrosides that provide intense sweetness without calories. When combined with allulose, a rare natural sugar, it creates a balanced sweetener that closely resembles the taste and texture of regular sugar.

PRODUCT DESCRIPTION

Livsmart Monk Fruit Sweetener with Allulose is designed as a healthier alternative to refined sugar while maintaining the same sweetness level. It dissolves easily in beverages and works well in cooking and baking. With zero net carbohydrates and minimal impact on blood sugar levels, it offers a convenient option for people following keto, low-carb, or reduced-sugar lifestyles.

MONK FRUIT SWEETENER

KEY BENEFITS

Can be added to foods and beverages just like sugar (1:1)

Contains zero calories

Does not impact blood sugar levels

Contains zero net carbs

Suitable for keto and other low-carb diets

WHAT IS IT

Monk fruit is a naturally sweet fruit that has been used for centuries as a traditional sweetener. Its extract contains compounds called mogrosides that deliver sweetness without calories. When blended with erythritol, a naturally occurring sweetener derived from fruits and plants, it creates a balanced sugar substitute with a clean taste and texture.

PRODUCT DESCRIPTION

Livsmart Monk Fruit Sweetener with Erythritol provides a convenient way to enjoy sweetness without refined sugar. The blend dissolves easily in drinks and performs well in baking and cooking. Because it contains zero calories and does not raise blood sugar levels, it is widely used by people following keto, low-carb, or reduced-sugar diets.

ERYTHRITOL SWEETENER

KEY BENEFITS

Suitable for keto and other low-carb diets

Contains zero net carbs

No added ingredients

Contains zero calories

Does not impact blood sugar levels

WHAT IS IT

Erythritol is a naturally occurring sugar substitute found in fruits and fermented foods. It is commonly used as a sweetener because it provides sweetness with virtually no calories or digestible carbohydrates. It makes erythritol a popular option for people looking to reduce sugar intake while maintaining the taste they enjoy.

PRODUCT DESCRIPTION

Livsmart Erythritol Sweetener delivers a mild and clean sweetness that is approximately seventy percent as sweet as sugar. It dissolves easily and can be used in beverages, baking, and everyday cooking. With zero calories and no effect on blood sugar levels, it is suitable for people following keto or low-carbohydrate diets.

STEVIA SWEETENER

KEY BENEFITS

Does not impact blood sugar levels

Keto and vegan friendly

No aftertaste

Contains zero calories

Contains zero net carbs

WHAT IS IT

Stevia is a plant-based sweetener extracted from the leaves of the Stevia rebaudiana plant, which is native to South America. The leaves contain natural compounds called steviol glycosides that provide strong sweetness without calories. When blended with erythritol, stevia creates a balanced sweetener with improved taste and smooth sweetness.

PRODUCT DESCRIPTION

Livsmart Stevia Sweetener delivers approximately twice the sweetness of sugar while remaining calorie-free. The blend dissolves easily in beverages and can also be used in baking and cooking. By combining stevia extract with erythritol, the sweetener provides a pleasant taste while helping support reduced sugar consumption and healthier dietary choices.

ALLULOSE SWEETENER

KEY BENEFITS

Does not impact blood sugar levels

Contains zero net carbs

Suitable for keto and low-carb diets

Low in calories

Browns, tastes and bakes like sugar

WHAT IS IT

Allulose is a rare natural sugar found in small amounts in certain fruits and foods. Although it tastes similar to regular sugar, the body does not metabolize it the same way, making it significantly lower in calories. Because of this property, allulose has become a popular sweetener for modern low-sugar diets.

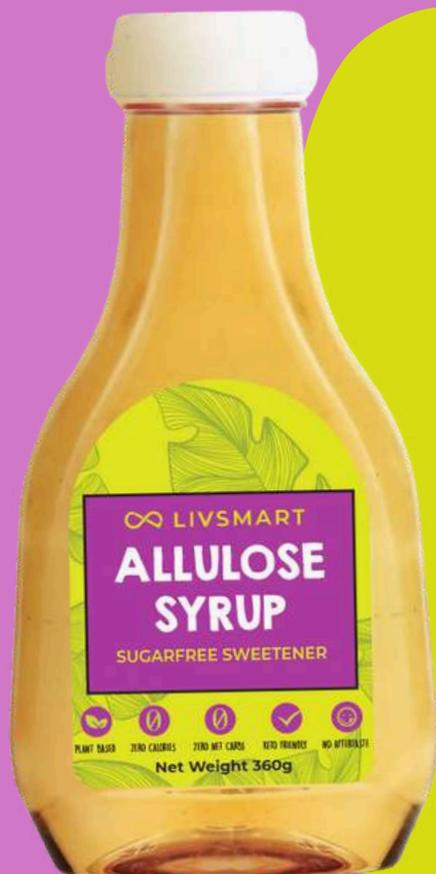

PRODUCT DESCRIPTION

Livsmart Allulose Sweetener provides a clean sweetness while behaving like sugar in cooking and baking. One of its unique advantages is that it can caramelize and brown, making it suitable for desserts and baked recipes. With fewer calories and minimal effect on blood sugar levels, it offers a versatile alternative to traditional sugar.

ALLULOSE SYRUP

KEY BENEFITS

Does not impact blood sugar levels

Contains zero net carbs

Contains zero calories

No aftertaste

Suitable for keto and low-carb diets

WHAT IS IT

Allulose syrup is a liquid sweetener derived from natural sources that delivers sweetness similar to traditional syrups. Unlike honey or maple syrup, it contains very few calories and does not significantly affect blood sugar levels, making it a popular option for people seeking healthier sweetening alternatives.

PRODUCT DESCRIPTION

Livsmart Allulose Syrup provides a smooth sweetness that can be used in beverages, desserts, pancakes, waffles, and other recipes. The syrup blends easily into drinks and foods while offering a lower-calorie alternative to conventional syrups. Its mild flavor and versatility make it suitable for everyday use.
